CAPABILITY STATEMENT

Locally Grounded Advice. Disciplined Project Delivery.

Mineral-project preparation, professional project management, investment readiness, ESG, institutional advisory and in-country support for Uganda's minerals sector.

CLIENT PROMISE

A clear scope • the right specialists • disciplined project controls • decision-ready outputs • accountable reporting

What we help clients solve

Mineral opportunities often stall because rights, evidence, specialists, stakeholders, schedules, budgets, risks and investor materials are not coordinated as one project. CMG provides the management and institutional bridge that brings these elements together.

Opportunity definition
Clarify the opportunity, evidence base, rights position, strategic fit and practical next steps.

Delivery coordination
Translate technical and commercial work into an integrated plan with owners, controls and reporting.

Investment preparation
Strengthen governance, documentation, data rooms and due-diligence readiness.

Uganda execution support
Provide locally grounded stakeholder coordination, partner mobilisation and implementation support.

CORE SERVICES

Five primary capability groups

1. Mineral Opportunity Assessment & Project Structuring

Desktop screening; mineral-rights and stakeholder mapping; commercial and ESG screening; development pathways; scope, budget and milestone design; project concept notes and opportunity briefs.

2. Project Management & Technical Coordination

Integrated work planning; schedules and budgets; risk and issue management; procurement and contractor coordination; specialist mobilisation; quality gates; document control; progress reporting and governance support.

3. Investment Readiness & Transaction Preparation

Readiness diagnostics; information memoranda; data-room structures; investor materials; use-of-funds logic; due-diligence coordination; partner mapping and transaction-process support. CMG does not provide regulated investment advice unless through appropriately authorised partners.

4. ESG, Community & Local-Content Advisory

Early ESG screening; stakeholder and community engagement planning; grievance pathways; local-content strategies; climate and infrastructure interfaces; responsible-sourcing and traceability readiness.

5. Institutional, Partnership & Market Development

Strategy and governance strengthening; partnership architecture; consortium development; in-country representation; technology and service-provider linkages; processing, offtake and market engagement support.

HOW WE DELIVER

Flexible engagement with accountable controls

Diagnostic	Focused assessment and prioritised action roadmap.
Fixed scope	Defined deliverables, schedule, budget, review gates and acceptance criteria.
Project management	Integrated coordination of workstreams, specialists, risks and reporting.
Retainer	Ongoing advisory, representation, proposal and partnership support.
Consortium	CMG contributes local knowledge, project leadership, stakeholder coordination or institutional support within a qualified team.
Project partnership	Structured participation where rights, mandate, responsibilities, economics and governance are clearly documented.

Our quality approach

1. Agree the decision the assignment must enable.
2. Confirm scope, evidence, assumptions, exclusions and required qualifications.
3. Mobilise appropriately qualified specialists for regulated or technical work.
4. Maintain schedules, budgets, risks, decisions, document control and reporting.
5. Use review gates before investor, regulator or public-facing release.
6. Close with accepted deliverables, lessons and next-step ownership.

Best-fit clients

Licence holders and emerging projects • investors and financiers • mining and service companies • government and development institutions • technology and infrastructure providers • international firms needing credible Uganda-based support

Capability boundary

CMG leads project preparation, coordination and institutional support. Geological, engineering, environmental, legal, financial and other regulated opinions are delivered or reviewed by appropriately qualified professionals under clear terms of reference.
